

Jetpack old system upgraded to Yahboom SUPER system

Jetpack old system upgraded to Yahboom SUPER system

1. Description

2. Upgrade method

2.1. Burn SUPER boot

2.2. Restore the factory image system

2.3. SSD expansion

1. Description

This tutorial is mainly provided for users who purchased the Jetson Orin series motherboard before January 22, 2025. Please follow the instructions below.

2. Upgrade method

2.1. Burn SUPER boot

Refer to the tutorial [Chapter 2 Motherboard Basics: Burn SUPER Boot] Operation: Completing this tutorial can allow the motherboard to start the Jetpack6.2 system.

2.2. Restore the factory image system

Refer to the tutorial [Chapter 2 Motherboard Basics: Restore the Factory Image System] Operation: Completing this tutorial can write the SSD to the SUPER (Jetpack6.2) system.

Note: You need to prepare the SSD box in advance

2.3. SSD expansion

Refer to the tutorial [Chapter 2 Motherboard Basics: SSD expansion] Operation: Completing this tutorial can allocate the unallocated space of the SSD.
